## Professional Summary

Senior Frontend Engineer with 10+ years of experience building scalable, high-load web applications and especially e-commerce platforms.

I specialize in designing and developing complex frontend systems with rich UI/UX using modern technologies. I follow a strong focus on web performance, maintainability, developer experience, and user satisfaction.

## Work Experience

[JiffyShirts.com](https://jiffyshirts.com)

Senior Frontend Engineer

Remote | November 2019 - Present

- Develop and maintain a large-scale e-commerce site with 100k+ users per day
- Implement, take care of the website cache, and clean up large A/B-tests on the site.
- I'm a top performer from the dev team for implementation and quality (I can send you recommendations from team-leads)
- Build new product features using React, Vue, and ES6
- Convert static design from Figma, Sketch and text description to performance UI-components with good quality in PageSpeed and maintainability.
- Maintain Code Review from 70+ developers every day, and often 1:1 to help them improve their code
- Define and enforce frontend code quality standards (ESLint, Jest, best practices)
- I almost fully replaced the FE on the site - replaced infrastructure with modern Webpack, reshaked deps, implemented performance tricks, and I've improved the critical metrics twice in PageSpeed Insights.
- Collaborate closely with backend engineers, designers, and product managers for a better user experience on the site
- I created a PoC-application in two weeks, which is now one of the main focuses for the company.

[Castle Digital Partners](https://castle-digital-partners.com)

Senior Frontend Developer

Russia, Samara | March 2015 - November 2019

- Built responsive, production-ready web interfaces using Typescript, React, Jest
- Worked on multiple client projects with varying complexity

- Maintained and improved existing frontend codebases
- I learned and demonstrated 3D web animation using ThreeJS for our designers, which helped us sell a couple of the coolest sites for our customers.

## Dominion

Frontend Web Developer

Russia, Samara | December 2010 - March 2015

- I helped the executive team find a new direction for a business like B2B. I implemented a first B2B solution for a month using AngularJS for a furniture factory: a public site for bulk buyers and an internal portal for order management.
- Coordinate the B2B dev-team and maintain enormous B2B enterprise solutions
- Developed complex UI interfaces, including animation-heavy components
- Implemented custom interactive features using JavaScript and AngularJS

## Education

Samara State Pedagogical University

Specialist degree, Computer science teacher · (2006 - 2011)

## Certifications

- Course finishing certificate “ChatGPT knows everything! Learn how to ask the right questions” from Artur Sharifov
- Course finishing certificate “The Last Algorithms Course You'll Need” from the Primeagen

## Awards

- 2nd place in the Programmers Delphic Games in the Web-Design Category (2008)
- Certification from Intel as a participant website developer in the regional contest (2005)

## Skills

- Programming Languages: JavaScript, TypeScript, Ruby on Rails
- Database Systems: MongoDB, PostgreSQL
- Testing Tools: Jest, React Testing Library, Storybook, Playwright
- Web Technologies: HTML, CSS, React, Vue, NodeJS, GraphQL, REST, NextJS
- Cloud Platforms: Vercel, Firebase, AWS
- DevOps Tools: Docker, Github Actions, Sentry
- Soft Skills: Strong Self-Organization, Problem-solving, Team Collaboration, Communication, Responsibility
- AI Assistant: Github Copilot
