Professional Summary
Senior Frontend Engineer with 10+ years of experience building scalable, high-load web applications and especially e-commerce platforms.
Expert in designing and developing complex frontend systems with rich UI/UX using modern technologies. Focused on web performance, maintainability, developer experience, and user satisfaction and effective collaboration in distributed/remote teams.

Work Experience
JiffyShirts.com
Senior Frontend Engineer
USA, Remote | November 2019 - December 2025
- Developed and maintained a large-scale e-commerce site with 100k+ users per day
- Optimized website caching strategies and managed the cleanup of large-scale A/B tests
- Recognized as a top performer within the development team for code quality and implementation speed
- Built new product features using React, Vue, and ES6
- Transformed static designs (Figma, Sketch) into high-performance, maintainable UI components, ensuring high PageSpeed scores
- Established code review standards for a distributed team of 70+ engineers, ensuring code quality and consistency
- Defined and enforced frontend code quality standards (ESLint, Jest, best practices)
- Revamped the entire frontend architecture, migrating to modern Webpack, optimized dependency management, implemented performance tricks, and improved critical metrics by 2x in PageSpeed Insights.
- Collaborated closely with backend engineers, designers, and product managers for a better user experience on the site
- Developed a Print-on-Demand PoC in just two weeks, which evolved into a primary revenue stream for the company

Castle Digital Partners
Senior Frontend Developer
USA, Europe, Russia | March 2015 - November 2019
- Built responsive, production-ready web interfaces using Typescript, React, Jest

- Worked on numerous projects of varying complexity for clients from the USA and Europe
- Maintained and improved existing frontend codebases
- Implemented 3D visualizations using Three.js, directly contributing to securing key client contracts

[Dominion](#)
Frontend Web Developer
Russia | December 2010 - March 2015
- Partnered with the executive team to identify a new direction for a business like B2B. Built a first B2B solution within a month using AngularJS for a furniture factory: a public site for bulk buyers and an internal portal for order management.
- Coordinated the B2B dev-team and maintained large-scale B2B enterprise solutions
- Developed complex UI interfaces, including animation-heavy components
- Implemented custom interactive features using JavaScript and AngularJS

Education
Samara State Pedagogical University
Specialist degree, Specialist Degree in Computer Science (2006 - 2011)

Certifications
- Course finishing certificate "The Last Algorithms Course You'll Need" from the Primeagen (Netflix)
